Story

Brown and I  
were watching  
**Interstellar**  
and we  
thought it was  
incredible...

**we kept  
thinking  
about  
incredible  
ideas..  
then it hit us..**

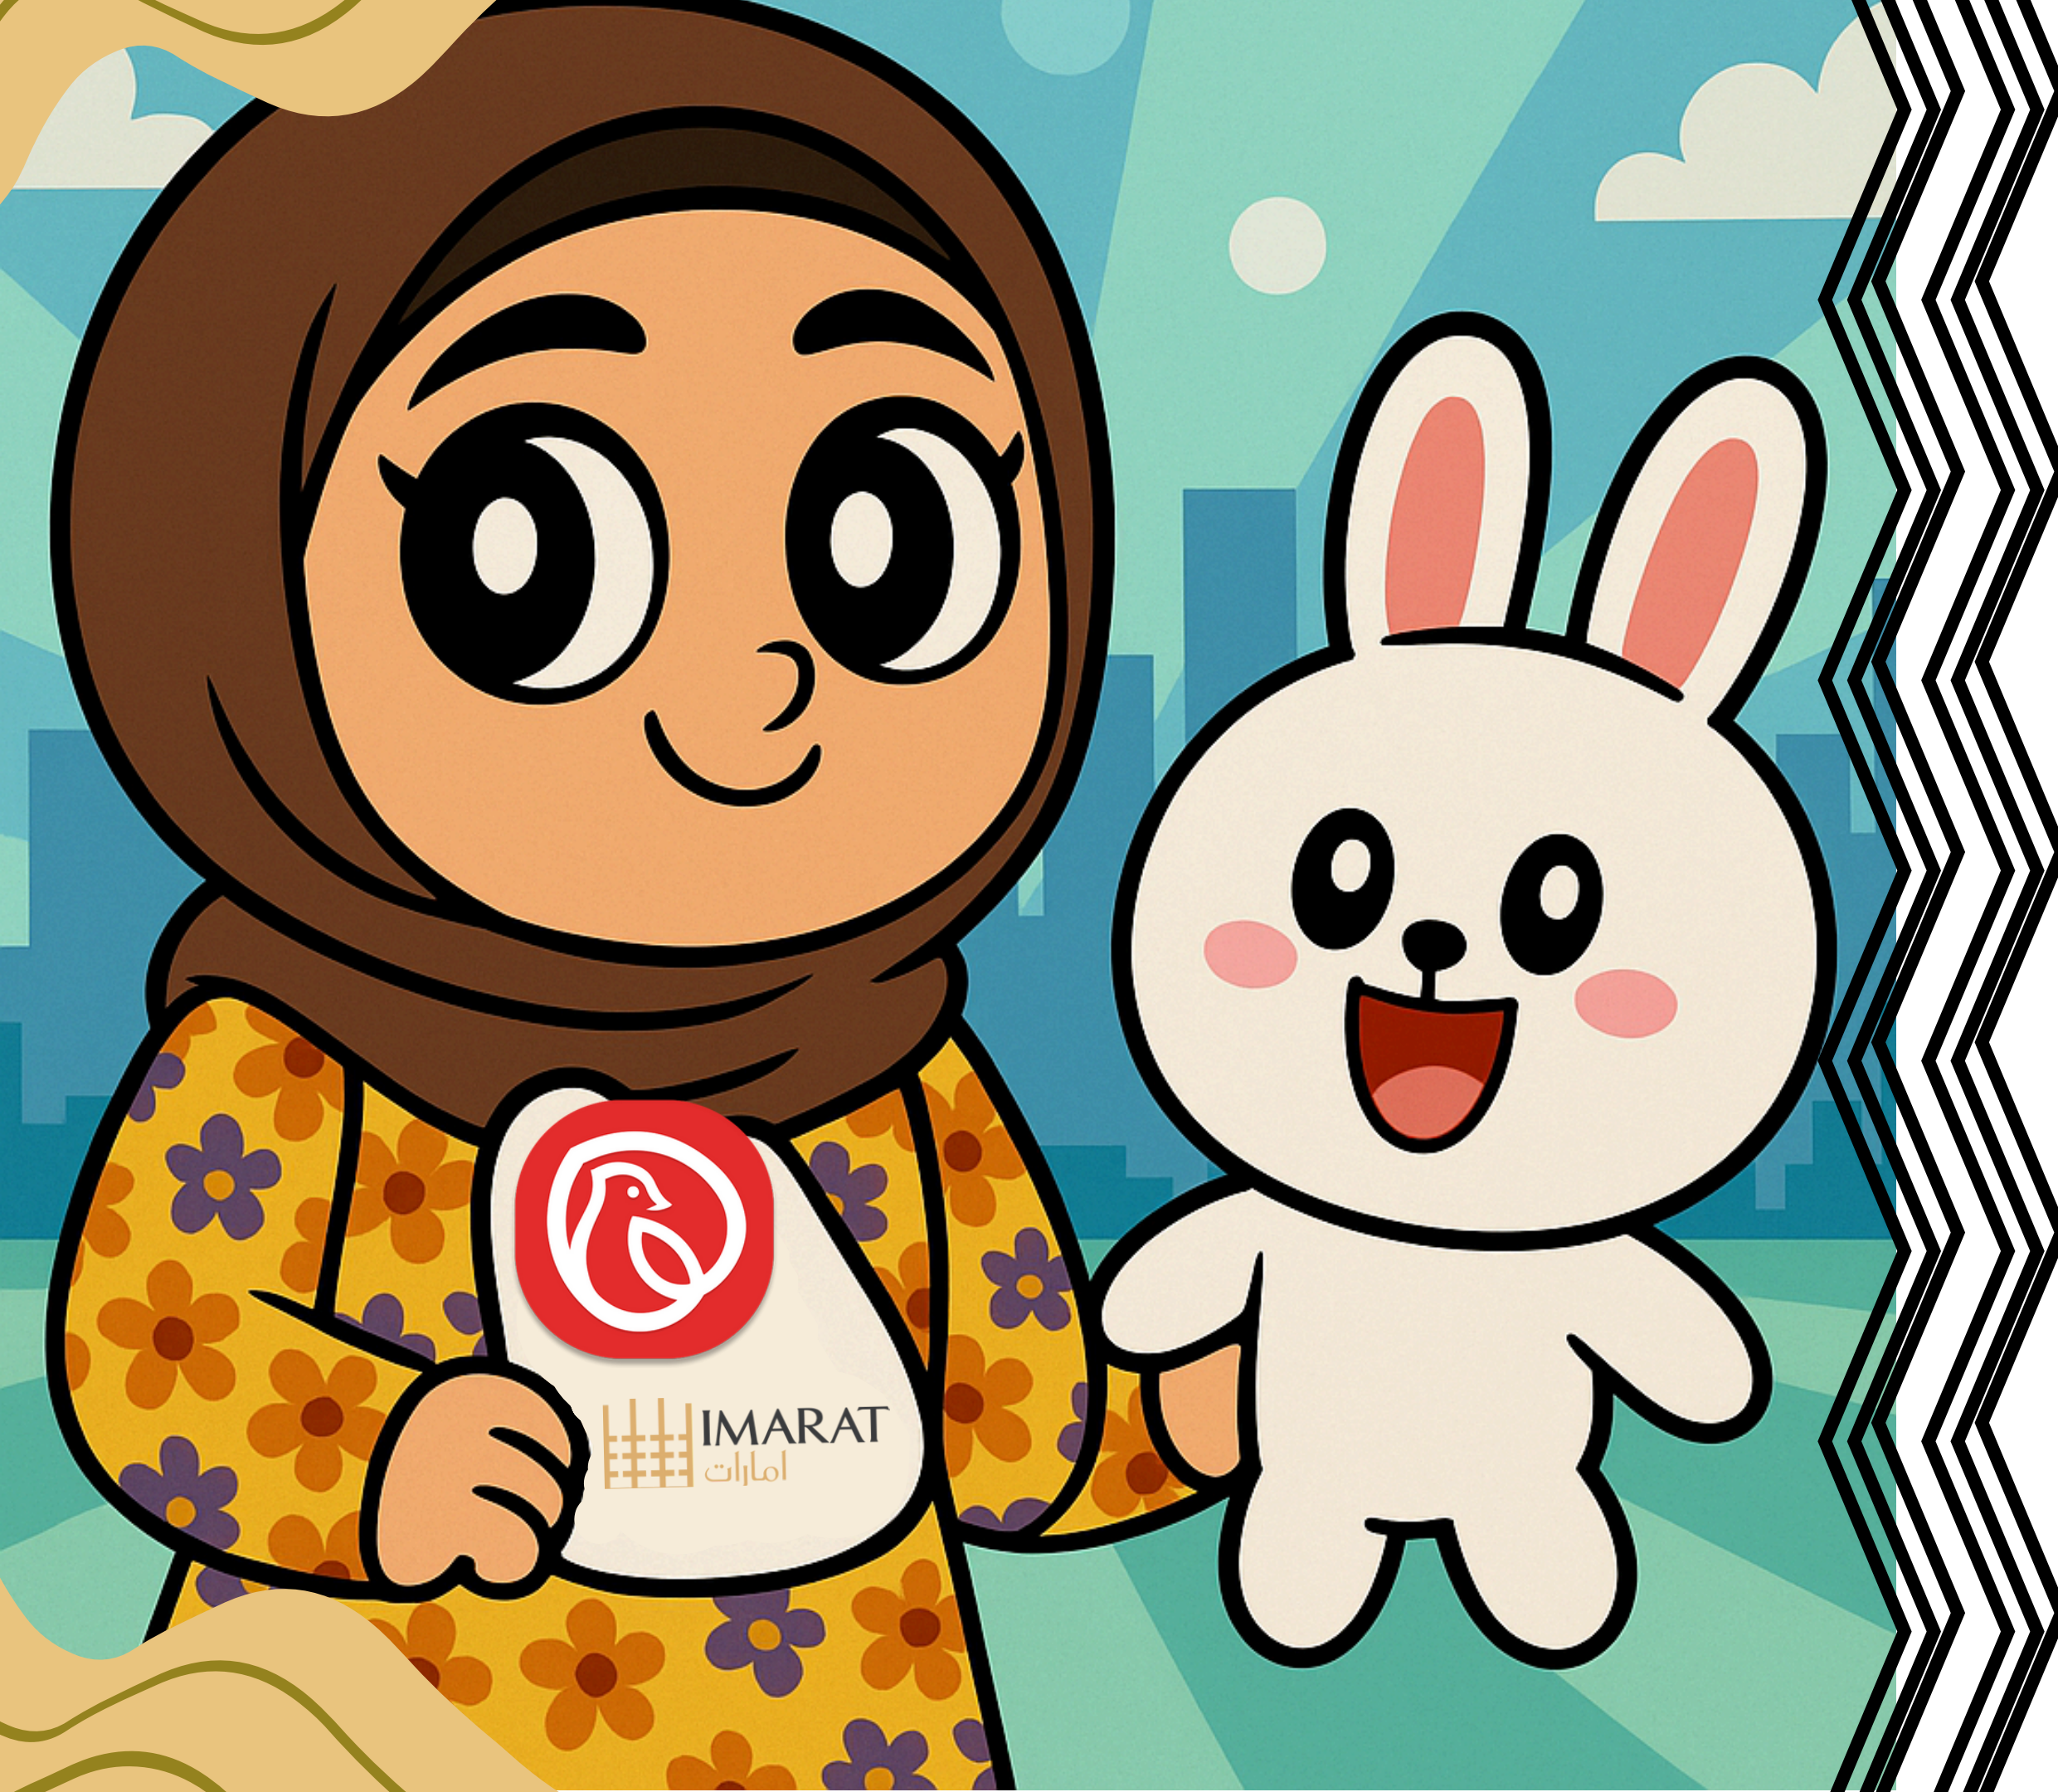

Some years back,  
a company called  
**Imarat** & its  
subsidiary  
company **Graana**  
started a  
campaign.  
It was called  
**Taleem se Tameer**

The main idea was outstanding.  
Basically,  
**Big Corporations and Government**  
collaborate and use  
**leftover or waste items**  
to  
**(Tameer) Build**  
**(Taleem) Schools**

We searched  
for the  
person  
behind the  
idea.

I found that the person behind the campaign was **Zoha Javed**, I searched up more and found that she is trying really hard to work for the **youth.**

in 2018 **Zoha** also worked on **Students Outlet**, the main idea of students outlet was to give students skills, job and entrepreneurial mindset as soon as they secure a position in a university.

It was well praised and also showcased in an ***international magazine*** but it was just an idea and never saw the light of day.

In conclusion, we found that there are some incredible ideas out there but we need government and youth to work together so these ideas can see the light of day.
